

# XWUIFormMaster

- This is a super component that handles both the form editing and the CRUD of a record or an entity or an object. Relies heavily on converting between JSON format and UI for:
  - FORM JSON
  - RECORDS JSON
  - RECORD JSON

## EDITOR PAGE – FORM EDITOR - VIEW

In this is the form editor page where you can drag and drop all input-related components that XWUI supports. In this sample, we're showing hard-coded components only.
